SUMMARY

Motivated and detail-oriented Cyber Security enthusiast with strong foundational knowledge in SOC operations, network security, and incident response. Skilled in monitoring security alerts, analyzing logs, and identifying potential threats using SIEM tools.

SKILLS

• Security Tools	Splunk (Basic), Wireshark, SIEM Concepts
• Networking	TCP/IP, DNS, HTTP/HTTPS, Firewalls, VPN
• Operating Systems	Windows, Linux
• Tools	Nmap, Metasploit (Intro level), Burp Suite (Basic)
• Others	Log Analysis, Incident Response (Basics), OSINT
• Cyber Security Concepts	IDS/IPS, Malware Analysis (basics), Threat Intelligence

TRAINING

Cybersecurity- CETPA Infotech Pvt. Ltd **Oct 2025 - Feb 2026**

- Strong foundation in network security and cybersecurity principles, including firewalls, IDS/IPS.
- Knowledge of threat detection, vulnerability assessment, risk management, and common cyber attacks (phishing, malware, ransomware).
- Hands-on experience with Wireshark, Nmap, basic penetration testing tools, encryption, and authentication methods.

EDUCATION

Bachelor Of Computer Applications **Aug 2022 - Aug 2025**

- Khalsa College Of Engineering And Technology, Amritsar

Intermediate **Mar 2020 - Mar 2022**

- V.M. Inter College, Gopalganj

Matriculation **Mar 2019 - Mar 2020**

- V.M. Inter College, Gopalganj

PROJECTS

Cyber Security AI Toolkit

- Developed a Python-based Cyber Security Intelligence Dashboard integrating AES encryption, SHA-256 hashing, network port scanning, packet sniffing, and vulnerability analysis for multi-layer security assessment.
- Built a machine learning–based cipher detection system for automatic encryption classification and designed a Tkinter GUI dashboard enabling real-time cybersecurity operations and threat analysis in a unified interface.

Malware Scanner

- Developed a Python-based virus scanner using file hashing (SHA-256) to detect malicious files against a signature database.
- Built a desktop GUI application with Tkinter for real-time file scanning and threat reporting.
